

GT60SH3V

New to our range this year is the HARRY GT60SH3V, manufactured in Italy. It has a substantial cutting width and has the advantage of 3 variable speeds allowing the user better control in variable conditions. This quality lawnmower is suitable for both domestic and professional users.

Powered by a reliable HONDA GXV160 163cc engine, it offers excellent grass collection even in damp conditions due to the four blade cutting system which creates more powerful under-deck air flow. With a cutting width of 60cm/24" it is ideal for gardens up to an acre and the substantial 85 litre grass bag with plastic top means minimised unloads to make light work of tending to your lawns so you can spend more time enjoying them.

Other features include a centrally adjusted cutting height lever (between 20 and 80mm), a durable steel deck, high quality steel wheels to ensure the machine is always easy to push, even when not in use, high rear wheels to maximise manoeuvrability and fold down handles to make the GT60SH3V both easy to transport and compact to store.

Two years limited domestic warranty.

Specification

Engine	HONDA GXV 160 163cc
Cutting Deck Size	60cm/24in
Drive	Self Propelled with 3 variable speeds
Deck material	Steel
Cutting system	Four blade cutting system Cut & Collect
