

RF 130 H

This Lawn-king Ride On Tractor is extremely versatile. Its main advantage is being able to cover large areas quickly because there is no grass collector to empty.

Powered by a reliable Briggs & Stratton 344cc engine and boasting hydrostatic variable speed transmission, there is no need to constantly change gears which makes light work of tending to your small to medium sized gardens. It also features a step through frame, making this machine easy to mount and dismount.

The floating offset deck boasts anti-scalp wheels which prevent damage to the grass surface and also makes it simple to mow close to any edges and around obstacles in your garden. It also has headlights for mowing in darker conditions.

Thanks to a small turning radius of just 46cm, mowing around bushes and flower beds is both safe and easy, and its large turf saving wheels means the machine can be used on uneven ground such as paddocks or orchards.

A Tow Hitch is integral and a range of optional machinery accessories are available to ensure this machine works hard for you all year round. Mulching Plug and Deflector come as standard.

Two years limited domestic warranty.

SPECIFICATION

Engine	B & S single cylinder 344cc
Cutting Deck Size	96cm/ 38in
Transmission	Hydrostatic
